

Forefront Protection Server Management Console 2010

Testumgebung:

1 x Windows Server 2008 R2 DC
1 x Windows Server 2008 R2 mit Exchange Server 2010 SP1 und Forefront Protection fuer Exchange Server 2010
1 x Windows Server 2008 R2 mit Sharepoint 2010 und Forefront Protection fuer Sharepoint 2010
1 x Windows Server 2008 R2 mit der Forefront Protection Server Management Console 2010

Alle Systeme sind EN.

Forefront Protection Server Management Console 2010 Installation

Nennen wir ihn kurz FPSMC ☺

Standalone, ist ja nur fuer meinen Sharepoint- und Exchange Server

Microsoft Forefront Protection Server Management Console 2010 Setup

Select a role for your server:

Server Roles

☒ Standalone

☐ Primary

☐ Backup

FPSMC needs a password to encrypt and transfer sensitive data between Primary and Backup servers.

Password:

Confirm Password:

Important: You must use the same password for both your Primary Server and Backup Server.

Next > Cancel

Express reicht fuer kleine Umgebungen

Microsoft Forefront Protection Server Management Console 2010 Setup

Select the type of database installation for the Microsoft Forefront Protection Server Management Console 2010.

☒ Express

Use Microsoft SQL Server 2008 R2 Express on the FPSMC Server. A dedicated server instance will be created for the sole use of FPSMC.

☐ Enterprise

Use an existing SQL server in your enterprise. Before proceeding with an Enterprise installation, make sure that your Database Administrator has created the FPSMC databases and the login user. You will need this information in a subsequent step.

Click Check prerequisites to have Setup verify that all needed prerequisites are present. It will then continue with the installation.

Check prerequisites Cancel

Lassen wir FPSMC mal checken ...

Da fehlt noch was

Der IIS ist (fast) ueberall dabei

SQL 2008 Express, man das Setup Programm installiert das sogar von alleine 😊

Das dauert aber ...

Na, die Chart Controls haette man ja auch automatisch installieren lassen koennen

Jetzt geht es endlich los

Es geht ab ...

Finish not swedish

Dann starten wir mal die Verwaltungskonsole

The screenshot shows the web interface of the Forefront Protection Server Management Console 2010. The browser window is titled "Forefront Protection Server Management Console - Windows Internet Explorer" and shows the URL "http://localhost/FPSMConsole/Default.aspx". The interface has a left-hand navigation menu and a main content area.

Navigation Menu:

Top 5 Viruses

Virus Name	Count
------------	-------

User Administration, ggfs. Benutzer hinzufuegen

The screenshot shows the 'User Management' page of the Forefront Protection Server Management Console 2010. The browser address bar indicates the URL is `http://localhost/FPSMConsole/UserManagement.aspx`. The left navigation pane includes sections for Home, Administration (with 'User Management' selected), Quarantine Management, Job Management, and Reports. The main content area is titled 'User Management' and contains a sub-header 'Administration > User Management'. Below this, a text block explains that users are added and removed from the console and must map to a local Windows account. A table titled 'Users' lists the following entries:

☐	Display Name	User Name
☐	Installation Administrator	trainer.internladministrator

To the right of the table is an 'Actions' panel with two links: 'Add Users' and 'Delete Users'.

Server Management

Server hinzufuegen und Agent deployen

The screenshot shows the 'Server Management' page of the Forefront Protection Server Management Console 2010. The browser address bar indicates the URL is `http://localhost/FPSMConsole/ServerManagement.aspx`. The left navigation pane is similar to the previous screenshot, but 'Server Management' is selected under the 'Administration' section. The main content area is titled 'Server Management' and contains a sub-header 'Administration > Server Management'. Below this, a text block explains that servers are added or removed, agents are deployed, and agent deployment status is checked. A table titled 'Server Selection' lists the following entries:

☐	Server	Status	Version	Description
--------------------------	--------	--------	---------	-------------

To the right of the table is an 'Actions' panel with four links: 'Add Servers', 'Delete Selected Servers', 'Deploy Agent' (which has a checked checkbox next to it), and 'Deployment Status'.

Add Servers

Administration > Server Management > Add Servers

Use this pane to add servers.

Select Servers

Select servers to add to the management console. Add servers using the Domain browser or enter the : servers list. Servers that are not part of the domain must be entered manually.

Note: After adding servers, you must deploy agents to them from the Server Management pane.

Domain Browser

Domain:

Server type:

Servers:

- Sharepoint
- TRAINER-DC

Selected Servers List

- Sharepoint.trainer.intern
- TRAINER-DC.trainer.intern

Deploy Agent

Administration > Server Management > Deploy Agent

Enter a username and password with administrative access to the selected servers. This password will be used to install the agent software. You can use the same password for all servers by selecting the "Use these the first row.

Server Name	Username*	Password
☒ Use these credentials for all servers	trainer\administrator	
sharepoint.trainer.intern		
trainer-dc.trainer.intern		

* Enter the username in the format domain\username or server\username.

Group Management

Server koennen gruppiert werden nach Funktionen etc.

Globale Konfiguration

Quarantaene Management

The screenshot shows the 'Exchange' section of the Forefront Protection Server Management Console. The left sidebar contains navigation links: Home, Administration, Quarantine Management (selected), Job Management, and Reports. The main content area is titled 'Exchange' and 'Quarantine Management > Exchange'. It provides instructions on viewing or managing quarantined items and includes a 'Filter View' button. Below this, it shows 'Quarantine results as of: 18.12.2010 13:15:00' and a 'Retrieve Qu' button. A table header for 'Quarantine View' lists columns: Detection Time, Server Name, Sender Name, Recipient Names, Subject, Incident Name, Incident Category, and Delivered. The table is currently empty, showing 'Page 1 of 1' and 'Displaying 0-0 of 0' records. A 'Quarantine Details' button is also visible.

Online Protection mit FOPE Integration (optional)

The screenshot shows the 'Online Protection' section of the Forefront Protection Server Management Console. The left sidebar is the same as the previous screenshot, but the 'Online Protection' link under 'Administration' is selected. The main content area is titled 'Online Protection' and 'Administration > Online Protection'. It provides instructions on using the pane to access FOPE administrative functionality. Below this, there are four sections, each with a button: 'Online Reports' (Access FOPE reports that are not available within the management console.), 'Hosted Quarantine' (Access items quarantined within FOPE.), 'Administration Center' (Access additional tools and features provided by FOPE through the FOPE Administration Center home page.), and 'Advanced Mail Tracing' (FOPE provides advanced mail tracing facilities.).
