SCCM 2007 - FEP 2010 dekommissionieren

Migrationsjobs SCCM 2012 loeschen

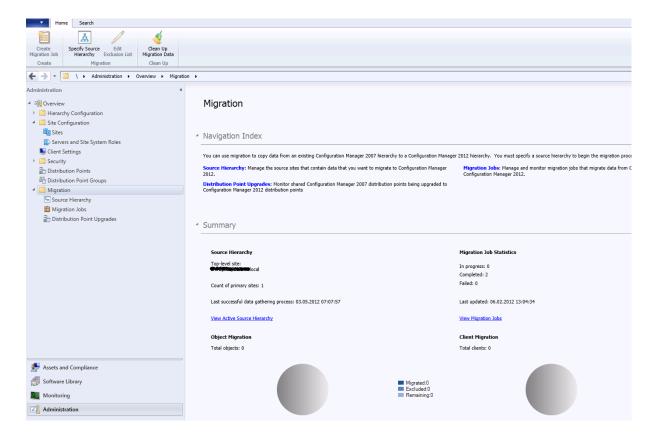

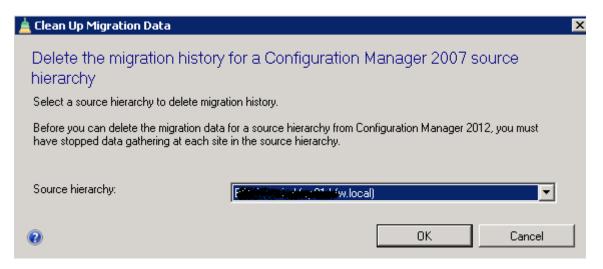

Do you want to stop gathering data from the Configuration Manager 2007 site?

When you stop gathering data from a Configuration Manager 2007 site, new or changed objects at the site are not identified and are not available for migration. Additionally, any Configuration Manager 2007 shared distribution points are no longer offered as content locations for packages that were migrated to Configuration Manager 2012.
